

OKS Legal Solutions

OKS Group Facilitates Legal Publisher Growth Through Comprehensive Translation Services

Our Client

One of the most prominent legal publishers in the US, providing tax, accounting and audit information, as well as software to their client base.

Objectives

To streamline work, this publisher sought to find a single vendor that could provide accurate technical translation services from 45 languages into English. All translators were required to be comfortable and confident in legal terminology.

Business Challenges

- Deliver quality, accurate translations of all languages
- Assure consistency of content in all languages

The Decision

OKS Group was awarded a long term partner services contract based on our ability to deliver the required translation capacity in a more efficient, outsourced organizational structure, while acting as an extension of the company.

Our Solution

OKS Group works with highly skilled freelance translators who possess significant experience in legal translations, and who have an ongoing working relationship with OKS Group.

On this project, our translators:

- Consistently deliver quality sourcing, translation and review services for the client
- Completed translation of treaties and forms from over 140 countries, from 45 different languages into English

Our in-house team continues to maintain and update a comprehensive catalog of translated treaties and forms. We provide complete transparency to existing operations, while maintaining necessary security, given the sensitive nature of the information being managed.

The Result

- Expansion of client capacity, enabling the introduction of new products at market-friendly prices
- Turnaround times exceeding client expectations
- Reduced average servicing costs while maintaining client's high quality standards
- Additional outsourcing services based on the success of the service partner relationship

Since 1985, outsourcing partner to some of the world's largest and most demanding companies, serving clients on 5 continents with 1500 associates.
